

Alignment of the

Experience Early Learning Skills

with the

Wisconsin Model Early Learning Standards:
Birth to First Grade (2011)

The Developmental Continuum of the Experience Early Learning Skills

The Developmental Continuum of the Experience Early Learning Skills is a research-based continuum of 36 skills that indicate child development and learning. Each skill has up to three measurable learning goals. For each goal, the continuum outlines benchmark levels for children from birth to age eight.

The Developmental Continuum of the Experience Early Learning Skills is a sequenced progression. Children progress at varying rates based on individual development and needs.

The Developmental Continuum of the Experience Early Learning Skills serves as the basis for the development of these curricular systems:

- Mother Goose Time
- Experience Baby
- Experience Pre-K
- Experience Play

The Developmental Continuum of the Experience Early Learning Skills is included in the appendix.

Visit http://mothergoosetime.com/all_about/research.php to learn how each Mother Goose Time tool supports developmentally-appropriate practice and child skill development.

Alignment

This document details the alignment of the Wisconsin Model Early Learning Standards: Birth to First Grade (2011) with the Developmental Continuum of the Experience Early Learning Skills.

Typically developing infants through first graders will fall between benchmarks A and G on the Developmental Continuum of the Experience Early Learning Skills for each skill. For more information, reference the full continuum.

Additional Learning Goals

The Wisconsin Model Early Learning Standards: Birth to First Grade (2011) do not encompass these Experience Early Learning Goals:

- 22.1 Understands citizenship
- 23.1 Identifies types of places
